REPORT

-of-

THE MEDICAL OFFICER

OF HEALTH

for the

URBAN DISTRICT OF HORNSEA

YEAR, 1952

HORNSEA URBAN DISTRICT COUNCIL

Report of the Medical Officer of Health for 1952.

To the Chairman and Members of the Urban District Council of Hornsea.

Sir, or Madam,

I beg to submit my Annual Report as Medical Officer of Health for the year ended 31st December, 1952.

The birth and death rate statistics call for little comment and stand at about the same level as in the past few years. The deaths from cancer remain fairly high though at about the average for the district, whereas those resulting from cardio-vascular degeneration have shown a marked upward trend accounting for no less than half the death rate.

Our continued immunity from notifiable infectious disease is very gratifying practically all the incidence being limited to measles of a mild type.

Rainfall.

The rainfall has been about the average level 24.96 inches throughout the year, the amount in the first six months being comparatively light. September was the wettest month - 4.00 inches and February the month in which the the least rain fell - 0.73 inches.

Statistics and Social Conditions of the Area.

Area 3437.73 acres inclusive of inland water.

General Provision of Health Services for the Area.

The only change to be recorded is the termination of the agency arrangement with the St. John Ambulance Brigade for the use of the ambulance, the vehicle now being under the direct control of the County Council.

Sanitary Circumstances of the Area.

Water.

Water is purchased in bulk from the Hull Corporation and is distributed by the Council.

The consumption during 1952 was 65,846,000 gallons, a daily average of 180,400 gallons, which is equivalent to 34 gallons per head of population per day.

Drainage and Sewerage.

No new developments have taken place during the year.

Public Cleansing.

The method of disposal of house refuse is by incineration, the material being collected by motor transport at approximately weekly intervals.

The income from salvaged material has decreased owing to increased difficulty in disposing of waste paper and a fall in its market value.
